Mojoy Chian

Senior Vice President, Design Services and Enablement

GLOBALFOUNDRIES

Mojoy Chian is Senior Vice President, Design Services and Enablement at GLOBALFOUNDRIES. He is responsible for global design enablement, services and solutions and is the primary technical customer interface for GLOBALFOUNDRIES. Mojoy is based in Sunnyvale, California, which serves as a Design Enablement center of excellence, and has responsibility for the company's Design Enablement capabilities around the world.

Mojoy has extensive leadership experience in silicon process technologies, specifically in the areas of design methodology and automation. Prior to joining GLOBALFOUNDRIES, he served as the Vice President of Technology Development at Altera Corporation, where he managed all development, infrastructure, and manufacturing aspects of silicon process technologies. Prior to that, Mojoy was Senior Vice President of Core Technology and Analog Engineering at Mindspeed Technologies, where he oversaw all central engineering and common technology activities, as well as all engineering disciplines for analog products development.

Mojoy holds bachelor's, master's and doctorate degrees in electrical engineering, as well as a masters' degree in applied math from Florida Institute of Technology.
