

Mike Lehnert

Michael Lehnert is President & Chief Executive Officer of LFoundry, a Pure Play Analog Mixed Signal foundry with an advanced 200mm 150nm silicon chip manufacturing facility. Located 60km to the North-East of Munich, the factory is situated in the heartland of automotive Europe and provides a strong strategic location for an analog mixed signal specialised foundry business in Europe.

Michael has more than 15 years of experience in the semiconductor business. In 2000, he became the Front End Process and Equipment Manager at Hitachi Semiconductor Europe GmbH. In 2003 Michael was promoted to Engineering & Fab Manager at Renesas Semiconductor Europe GmbH. During this period he was responsible for establishing Silicon Foundry Business with major IDMs, thus paving the way for the LFoundry business model.

One year down the line, despite a depressed business climate, LFoundry has successfully won several large orders from European customers and looks forward to many years of flourishing business.

Prior to Hitachi, Michael started at Texas Instruments with a study of Poly Silicon in BiCMOS technology. He holds a Diploma Degree in Physics from the Technical University in Munich, Germany. He was born in Erding, Germany, is married and has two sons & a daughter. Michael is result-oriented and effective leader with proven success in new market identification, technology development, strategic planning and lean management with the ability to proactively identify new trends and business opportunities.
